

## Chassis - Mounting & Alignment

### Toe-In Gauge

Manufacturer: RPM (70492), [item number: 55101](#)

### Monster Camber Gauge

The Monster Camber Gauge is capable of measuring the camber angle on tires up to 6.5 inches and taller (depending upon the belly height of the tire) and as small as 2 inches in diameter. The Monster Camber Gauge has a camber accuracy to within of a degree and can measure camber angles way beyond a realistic and usable range (positive or negative 10 degrees!) for universal versatility.

Manufacturer: RPM (70950), [item number: 55111](#)

### Precision Camber Gauge

One of the most critical adjustments on a R/C vehicle is the vehicle's camber. Even the most experienced drivers cannot set their camber by eye. With this Camber Gauge, novice to professional drivers alike can set their camber on all wheels to less than one degree of accuracy! Once camber has been set and documented, this gauge will be able to tell you if a crash has affected your camber!

Manufacturer: RPM (70992), [item number: 55112](#)

### Shock Duplicator

Shock Duplicator for use with all shocks up to 158mm long using 3 mm mounting screws. Simply bolt a pair of shocks to our Duplicator and, following the straightforward instructions included, you'll take all of the guesswork out of your suspension system.

Manufacturer: RPM (70972), [item number: 55114](#)

### Ride Height Gauge 1/8

Fully adjustable from 15mm-45mm.

Manufacturer: Team Associated (1449), [item number: 55123](#)

### Droop Gauge

Range: 1 mm - 8 mm.

Manufacturer: Team Associated (3987), [item number: 55131](#)

### Shock Rebuild Stand, Blue

Holds 1/10 and 1/8 scale shocks, constructed of plastic. Upper and lower plates hold four top and four bottom sections of shock bodies for ease of rebuilding. Magnetic plate with bottom lip holds small metal parts in place.
